

A man and a young boy are sitting on a concrete pier, fishing. The man is wearing a blue t-shirt and khaki shorts, and the boy is wearing a blue and white striped t-shirt. They are both holding fishing rods and looking out at the water. In the foreground, there is a green fishing net, a silver bucket, and a silver thermos. The background shows a calm body of water under a clear sky.

Intermediary loan process

- Finnish legislation enables OP Mortgage Bank to grant intermediary loans to the member cooperative banks, who indirectly participate in the covered bond issuance process.
- In the intermediary loan process, an intermediary loan contract is made between the member cooperative bank and OPMB. The member cooperative banks allow OPMB to mark mortgages as intermediary loan collateral to the OPMB cover pool in return for funds from the emission.
- The loans eligible as collateral for a covered bond must meet the legal requirements as well as the criteria of OPMB's covered bond program and other specified criteria. The member cooperative bank commits to preserving adequate intermediary loan eligible loan portfolio for the maturity of the intermediary loans. OPMB monitors the adequacy of the collateral daily.
- Once the mortgage loans are registered in the OPMB cover pool via intermediary loan process, they serve as collateral for the covered bonds for the benefit of the noteholders until the intermediary loan expires.
