## Investment policy

OP-Finland Index Fund is a passive index fund that invests its assets according to the index Nasdaq OMX Helsinki Benchmark Cap. This means that the Fund's investments are split between the companies of the benchmark index in the same proportion as in the index. Since the Fund aims to generate the same returns as the benchmark index, it only keeps a small portion in cash for the purposes of redemptions. In order to lower its trading needs arising from redemptions and subscriptions, the Fund may to a limited extent use derivative instruments in portfolio management. Due to the structure of the Fund, its investments can be highly concentrated on certain sectors, such as industry, finance and technology. The Fund's trading costs are relatively low as changes to the portfolio are basically only made in conjunction with index adjustments.

The investments underlying this fund do not take into account the EU criteria for environmentally sustainable economic activities. However, this fund integrates sustainability risks using the methods specified in the fund prospectus.
